Southeast Rock Groundwater Contamination Site
Superfund/Technical Reports

Dear Mr. O'Connell

On August 28, 2006 a Consent Decree ("Consent Decree") was entered in the case of *United States of America v. Glen Ekberg*, Case 01 C 50457, in the United States District Court for the Northern District of Illinois, Western Division. Pursuant to Section VII., Access and Institutional Controls, at page 11, paragraph 11 of the Consent Decree, you agreed to provide access to your property and agreed not to interfere with investigation activities to be performed on your property by the State, including the Illinois EPA and its contractors. Illinois EPA is providing you with notice that pre-design activities, which will assist in determining the extent of contamination, will resume on your property through its contractor Camp Dresser & McKee. It is anticipated that the Illinois EPA and/or its contractor will be on the property performing the work between December 3 and December 21, 2007. This portion will take approximately 3 to 5 days to complete weather pending once the work has begun. Illinois EPA's contractor will be employing subcontractors to perform specific duties related to a geophysical survey to determine the location of buried features related to Remedial Design. No soil or groundwater samples are to be collected during this phase of the pre-design work. If an exclusion area is required and set up for safety pursuant to 29 CFR Parts 1910.120 and 1926, and if you so choose, you and/or your representative may view the activity from outside the established exclusion area. Appropriate law enforcement agencies will be notified of any harassment or disruptive behavior directed towards Illinois EPA personnel or Illinois EPA's contractor.

If you have any questions, please feel free to contact me at 815-223-1714 or Terry Ayers at 217-524-
